# MEASURING GUIDE

## TOOLS REQUIRED

Metal Measuring Tape  
Paper & Pen

## MEASURING GUIDELINES FOR BLINDS

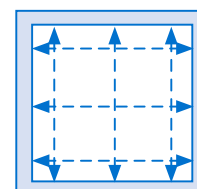

1. Only use a steel measuring tape.
2. Measurements must be accurate and to the nearest millimeter.
3. Decide on how you want the blind fitted? Inside the Recess or Outside the Recess.
4. Always measure the width first and then the drop.
5. Record your measurements in the same order.
6. Keep an eye out for handles or tiles. You'll need to take their position into account to ensure a perfect fit.
7. Finally, re-check your width and drop measurements to ensure accuracy.

## NOTE

Please supply exact measurements in millimetres. We will make necessary allowances to ensure a proper fit.

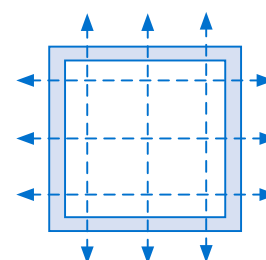

## INSIDE RECESS

Measure at 6 points indicated in the picture. Record the smallest dimension as "Recess size". This will result in the head rail being made 12-13 mm narrower in width and the louvers/slats being made 8 – 10 mm shorter in length to allow for a snug fit inside the recess.

## OUTSIDE RECESS (BLIND SIZE)

Measure at 6 points indicated in the picture. For best results, add an overlap of 100 mm (4" approx.) to the largest dimension and record your measurements as Blind Size. This will result in the blind being made to the exact size specified.

## BAY WINDOWS

The following information will be required for us to calculate the correct sizes of your blinds for Bay windows.

Drawing of window shape labeled from left to right referencing each individual window e.g.: A, B, C etc.

1. Angles of intersection
2. Exact width (without any deductions of each section of the bay window)
3. Exact drop (without any deductions of each section of the bay window)
4. The depth of any major obstructions e.g.: handles
5. Fixing method i.e. Top or Face Fix (with bracket projection)
6. Blind Type i.e. vertical, roller etc
7. Once the above information has been provided together with actual fabric and control specifications we will calculate the final blind sizes.

The Seller's liability in respect of the goods supplied shall not extend to the Buyers loss of profits, increased cost of working or any other consequential or financial losses.

## FOLIO LIFETIME WARRANTY

The Seller shall not be obliged to replace goods once they have been cut, made or hung.

A standard handling charge of 20% plus the cost of carriage will be made for returning goods otherwise authorised.  
Cut or treated fabrics will not be accepted for return or credit.

## PATTERN REPEATS, JOINED WIDTHS & PATTERN ALIGNMENT

Please note pattern repeats of all fabrics can vary by +/- 5%, we cannot guarantee exact measurements. Please ensure that pattern alignment is adequate to produce a satisfactory result. Textiles are not completely stable. It is always possible that the pattern will not be completely 'square' on the cloth. Whilst every effort is made to avoid distortion, a commercial tolerance is to be accepted. Please check the pattern alignment is acceptable before cutting and making we do not accept claims after the goods have been cut or sewn.

## COLOUR MATCHING

Whilst every effort is made to ensure your order will colour match the samples and pattern books we must point out that an exact match cannot be guaranteed. Should a close match be required the buyer must request a stock cutting for approval prior to ordering.  
Please note that none of our fabrics are guaranteed against fading.

## FABRICS USED AS DRAPES

When held against the light fabrics cannot be guaranteed to be free of visible flaws.

## MOVEMENT OF CURTAINS IN SITU

All fabrics are liable to shrinkage; therefore it is important that an allowance (5%) is allowed when making up. Atmospheric conditions such as temperature and humidity can vary. This may affect curtains when hung in situ particularly. Cellulosic yarns, viscose, or rayon and natural fibres such as cotton and linen may shrink or relax due to changes in humidity. Heavy fabrics and loose weaves may relax and lengthen.  
Curtains should always be made with adequate hem, loosely tacked. Side seams or attached linings should be hand slipped to allow for differential movement between face and lining fabrics. Always use an appropriate thread for the fabric you are sewing.  
We recommend avoiding exact length curtains, i.e Sill or floor touching and do recommend over length curtains. All curtains must be made with the possibility of making adequate adjustments in the event of any movement in the curtains. Any adjustments remain the responsibility of the maker.  
Movement of curtains in situ cannot be accepted as a fault in the fabric and claims will not be accepted.

## SILK & LINENS

Please note that silk and linen will contain small colour variations and weave slubs, causing differentiation of densities when held against the light. This is not a defect.  
Silk is unsuitable for any type of loose covering or tight upholstery. The dyes used are vegetable based and are therefore particularly vulnerable to fading in direct sunlight. Impurities in the air also cause fading. Special care should be taken to ensure that the leading edges of the curtain are turned away from the window and are faced into the room. We recommend lining and interlining when making up silk curtains. Linen has a natural characteristic to crease.

## METALLIC

Some of our designs have a deliberate Gold or Silver antique metallic over print. There will be variations in shade and differentiation of densities when used on any textiles such as linen or silk and any fabric with a velvet pile.

## POCKET WEAVE

Pocket weaves have a complex construction. Two layers of the fabric woven simultaneously and joined with the chenille / cotton yarn to create the design of the fabric. This technique gives a slightly quilted look to finished curtains which is characteristic of this construction. We recommend a sample is always requested prior to ordering.

## SHEERS AND VOILES

Fully joining the widths is not recommended. The normal accepted way is to join the widths at the top of the tape, to weight the bottom and to leave the drops loose and not sewn together.

## FLOCKS, VELVETS & PILE FABRICS

The rolls of fabric should not be dropped or stored on end as permanent creasing will result. All textured or pile fabrics may flatten. Piles may distort. Slight colour variations may occur between each batch.

## TITLE OF GOODS & COPYRIGHT

All products remain the sole property of the Seller until full payment has been made.  
All designs, drawings, etc are the Sellers copyright. Any infringement of which is actionable in law.

## WASHING & CLEANING

Always follow the washing and cleaning instructions. Detergents containing optical brightening agents will make dark, and pastel shades appear lighter. Coloured items should be washed separately.
